

POSTWORKS

CONNECT

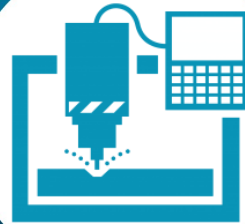

NUMERICAL CONTROL COMPUTER SCIENCES

Advanced *PostWorks* innovation,
with *Connect* technology

PostWorks Connect is our latest innovation, combining an easy to use interface, with the advanced functionality for complete control for your machine code.

FEATURES

Here Are Just Some Of The Features

Complete Cycle Support for 5-axis+

One Postprocessor Solution for
All Your Machines

Total Output Control With Ability to
Adjust Output Date With Scale, Mirror,
Translate & Rotate

Developed to Optimize the
Performance of CNC Machines

Macro Capability for Advanced
Customization

Plugin Control to Convert Any Known
CAD/CAM Format For Virtually Any CNC
Machine Control

Complete CYCLE Support &
Customization

Clone Existing Posts With The Ability to
Quickly Modify Specific Aspects For
Machines With Similar Configuration

Other Products

We Also Supply Other Software

NCL CAM Software

NCL is a powerful Computer-Aided Manufacturing system designed to provide a maximum degree of flexibility in creating tool paths to produce machined parts of any complexity.

IPV Software

In-Process-Verification (**IPV**) Software is **NCL**'s integrated numerical control simulation and verification module.
